

The most appropriate way for us to be introduced to you for possible acceptance into our program is for you, the requestor and potential client, to provide us with a 2 page (maximum) synopsis of your story. This should include at minimum:

- 1) What ill effects you are experiencing currently;
- 2) The circumstances surrounding their commencement, what did or may have contributed to their inception, if known;
- 3) Any key players, parties involved (be as specific as possible)
- 4) How this has affected your life, relationships, work, etc.
- 5) What testing you have already undergone and the results
- 6) What you wish to accomplish
- 7) Anything else we need to know significant or critical to our being able to help you.

If you have not had toxicology tests and reports created or proof by an expert for RF or other signals emanating to or from your body, we will require these to be done in addition to possibly obtaining a Psychological Evaluation (for purposes of building your file). This information is vital in determining what is occurring with you and how to proceed. Please start by filling in the form below. True legal names are required:
